

Global Energy Transformation Programme (GET.pro)

A Joint Action Platform to Advance Energy and Climate Goals

The world faces two central challenges that need to be resolved by middle of this century: meeting the growing energy demand to power socio-economic development in the global South while at the same time phasing-out CO2 emissions.

Technically and economically, solutions to tackle these challenges are already available today. Yet more coordination and concerted action are needed to leverage their full mitigation potential and deliver on a global energy transition at the required speed.

GET.pro is a multi-donor platform bundling European forces in order to scale-up joint action towards energy sector transformations in partner countries and regions.

Co-funded by the European Union, Germany, Sweden, the Netherlands and Austria, GET.pro answers to the need for concerted efforts with its **intrinsic partnership** and **joint action approach**.

Directly feeding into other multilateral or bilateral programmes, GET.pro is able to **scale results**.

THE JOINT ACTION PLATFORM

Agile and complimentary instruments address key elements of an energy transition, and allow GET.pro to deliver on energy and climate goals:

- ▶ **GET.invest** mobilises private investments in clean energy by building a pipeline of bankable investment projects.
- ▶ **GET.transform** supports public-sector partner countries and regions in advancing their power system transformations.
- ▶ The **Secretariat of the Africa-EU Energy Partnership (AEEP)** promotes strategic political dialogue between Africa and Europe on energy.

GET.pro is co-funded by

ACCELERATING ENERGY AND CLIMATE PROGRESS

By working both with the public and the private sector, GET.pro helps to create the alignment and conditions needed to accelerate the energy transition in an integrated manner. The GET.pro instruments enable **focused and scalable interventions to unlock progress at strategic, policy and investment levels:**

THE GET.PRO IMPACT THUS FAR

Joining forces in advancing the global energy transition means achieving more at a higher speed.

Drawing on over a decade of experience through its predecessor programme, GET.pro has significantly contributed to addressing the combined energy and climate challenge.

Through its dedicated instruments, the platform has furthered **a mutually beneficial African-European cooperation on energy**, supported partner countries in **developing effective policy and regulatory frameworks**, and built a **strong pipeline of investment-ready projects**.

	Strengthened cooperation	between Africa and Europe
	65 transformation processes	supported
	40+ policies	and regulations developed
	1.2 billion EUR*	investment volume
	15 million people*	with access to affordable, clean energy
	1.1 million tCO₂e/a*	emissions avoided

*Projections based on the 200+ clean energy projects GET.invest has supported in reaching bankability. © GET.pro
