

Global Energy Transformation Programme (GET.pro)

A Joint Action Platform to Advance Energy and Climate Goals

The world faces two central challenges that need to be resolved by middle of this century: meeting the growing energy demand to power socio-economic development in the global South while at the same time phasing-out CO2 emissions.

Technically and economically, solutions to tackle these challenges are already available today. Yet more coordination and concerted action are needed to leverage their full mitigation potential and deliver on a global energy transition at the required speed.

GET.pro is a multi-donor platform bundling European efforts in order to scale-up joint action towards energy sector transformations in partner countries and regions.

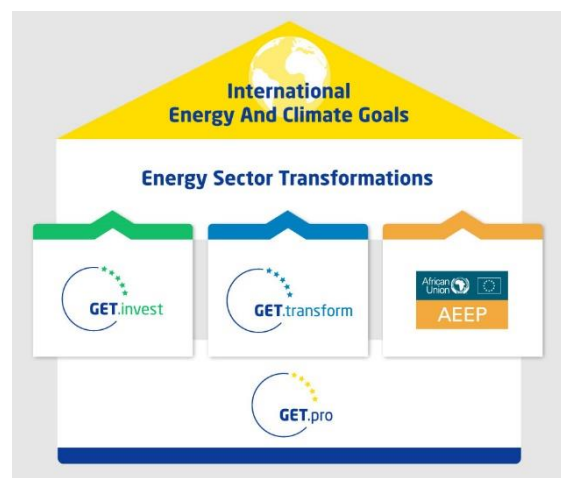

Co-funded by the European Union, Germany, Norway, the Netherlands, Sweden and Austria, GET.pro answers to the need for concerted efforts with its **intrinsic partnership** and **joint action approach**.

Directly feeding into other multilateral or bilateral programmes, GET.pro is able to **scale results**.

THE JOINT ACTION PLATFORM

Agile and complimentary instruments address key elements of an energy transition, and allow GET.pro to deliver on energy and climate goals:

- ▶ **GET.invest** mobilises private investments in clean energy by building a pipeline of bankable investment projects.
- ▶ **GET.transform** supports public-sector partner countries and regions in advancing their energy transformations.
- ▶ The **Secretariat of the Africa-EU Energy Partnership (AEEP)** promotes strategic, political dialogue between Africa and Europe on energy.

GET.pro is co-funded by

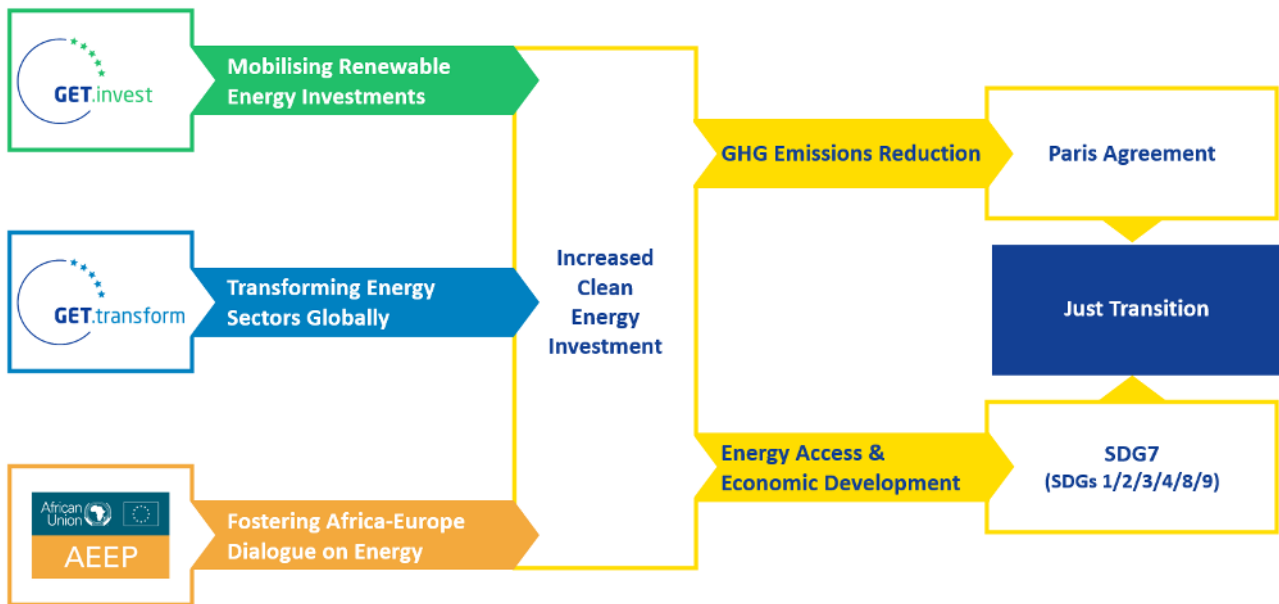

ACCELERATING ENERGY AND CLIMATE PROGRESS

In order to achieve international energy and climate goals, **conducive conditions for investment in the global energy transformation** must be put in place. By working with both the public and the private sector, GET.pro helps to create the alignment and environment needed to accelerate the energy transition in an integrated manner.

With a particular focus on Africa as a high-impact region, GET.pro promotes joint action at a global scale and actively contributes to realising energy and climate objectives as captured in the Sustainable Development Goals 7 and 13.

The GET.pro instruments enable **focused and scalable interventions** to simultaneously **unlock progress at strategic, policy and investment levels**:

The Leading TA Programme to Support Bankability and Build a Pipeline of Investible Projects

THE CHALLENGE

GET.invest addresses the **lack of bankable projects and companies**. Many project developers **struggle to identify matching finance**, present viable propositions, or successfully close negotiations. This is a systemic problem preventing the deployment of available capital and thus access to clean energy.

GET.invest Stories

THE RESULTS

As a leading initiative, GET.invest delivers strong and tangible results:

- Pipeline development with **more than 450 supported projects** with a high success rate
- **Wide reach in the market**, with more than **18,000 participants** to supported events and a strong presence on social media
- A **strong and vibrant cooperation network** with associations, financiers and peers
- Creation of a **single access point to European support and finance instruments**: the Team Europe One Stop Shop for Green Energy Investments

THE SOLUTION

GET.invest offers a **proven suite of support services**, deployed across countries and open to all beneficiaries:

- **Advisory support to project developers** and companies towards bankability
- Working with domestic financiers to **mobilise local currency finance**
- Events and **cooperation with associations** for outreach and mobilisation
- **Investment-related market information**, including database of finance instruments

Modular and scalable, GET.invest's support offer can be replicated across countries and regions.

Effectively Advancing Power Sector Transformations in Partner Countries and Regions

THE CHALLENGE

The world's pathway to net zero foresees the power sector delivering 60 percent of the required energy-related CO₂ emission reductions. At the same time, more than half a billion people still lack access to electricity. Though the opportunities and **need for power sector transformation** are recognised by most public-sector actors, often the **institutional, regulatory, and technical environment** is **yet to be built** in order to enable broad-based investments into sustainable power supply and distribution.

THE SOLUTION

GET.transform is a reputable and trusted partner to country governments and regional institutions for advancing power system transformations with the following key features:

- **Systematic public-sector advisory services** across 4 key energy transition themes
- **Scaling-up** and **mainstreaming country and regional experiences** in Africa and Latin America and the Caribbean
- **Cost-efficient implementation** following a standardised and replicable thematic and geographic approach

THE RESULTS

- **In-depth power system transformation** support to 3 energy ministries, 2 national and 1 regional electricity regulator as well as 1 power system operator in 3 countries
- **Regional capacity building** with 6 electricity regulators, 5 power pools as well as 14 national energy planning departments in the Africa and LAC regions
- Including predecessor programme, **more than 30 policies** and **regulatory frameworks** were supported

Africa and Europe's Gateway for Joint Action on a Green Energy Future

THE CHALLENGE

Africa and Europe are both seeking to address the fundamental energy and climate challenges of our time, as expressed in the European Green Deal, Agenda 2030 and Agenda 2063. **While many priorities, particularly on energy access, are shared, they are not fully aligned yet.** Achieving these goals synergistically requires the two continents to **further strengthen their collaboration on energy.**

THE SOLUTION

As the recognised facilitator of bicontinental dialogue and action on energy, the **Africa-EU Energy Partnership (AEEP)** provides a forum for:

- **political dialogue** and green diplomacy
- **generating knowledge and evidence-based products** for successful energy transitions
- **capacity support to African institutions** to strengthen African voices within the partnership and international fora

Advancing an **inclusive partnership of equals**, a focus of the AEEP activities lies on highlighting benefits that enable successful, intertwined energy transitions on both continents.

AEEP Activity Areas

To carry out its mandate, the AEEP supports African and European actors to implement key initiatives and actions through:

THE RESULTS

Since its inception at the first AU-EU Summit in 2007, the AEEP has

- **placed energy prominently on the bi-continental agenda**
- **supported** the establishment of **dedicated initiatives** (SEforALL, AREI, RES4Africa)
- **showcased progress** (AEEP Forum and High-level Events, SDG7 Report)
- created **innovative ideas and knowledge** for an African energy transition (AEEP Energy Talks, SEI Report, Green Hydrogen Policy Brief).

THE GET.PRO IMPACTS THUS FAR

Drawing on over a decade of experience through its predecessor programme, GET.pro has significantly contributed to addressing the combined energy and climate challenge. Through its dedicated instruments, the platform has furthered a **mutually beneficial African-European cooperation on energy**, supported partner countries in **developing effective policies**, and built a **strong pipeline of investment-ready projects**.

*Projections based on clean energy projects, that have been accepted by financiers.

MOMENTUM FOR GREATER IMPACT

By joining forces, the development community can overcome the plethora of individual projects and unlock progress faster. GET.pro enables existing programmes and initiatives to offer joint solutions through:

- Highly-specialised advisory support
- Quick mobilisation through standing pools of experts
- A flexible delivery mode tailored to needs of partners and contributors
- Linkages between national, regional and global practices
- A strong international partner network.
