

# Introducing GET.invest

GET.invest is a leading European programme that mobilises investment in clean energy, closing the gap between finance demand and supply. Since 2016, the programme has supported over 650 projects and companies on their journey to financial close – driving energy market development and unlocking partnerships and investment.

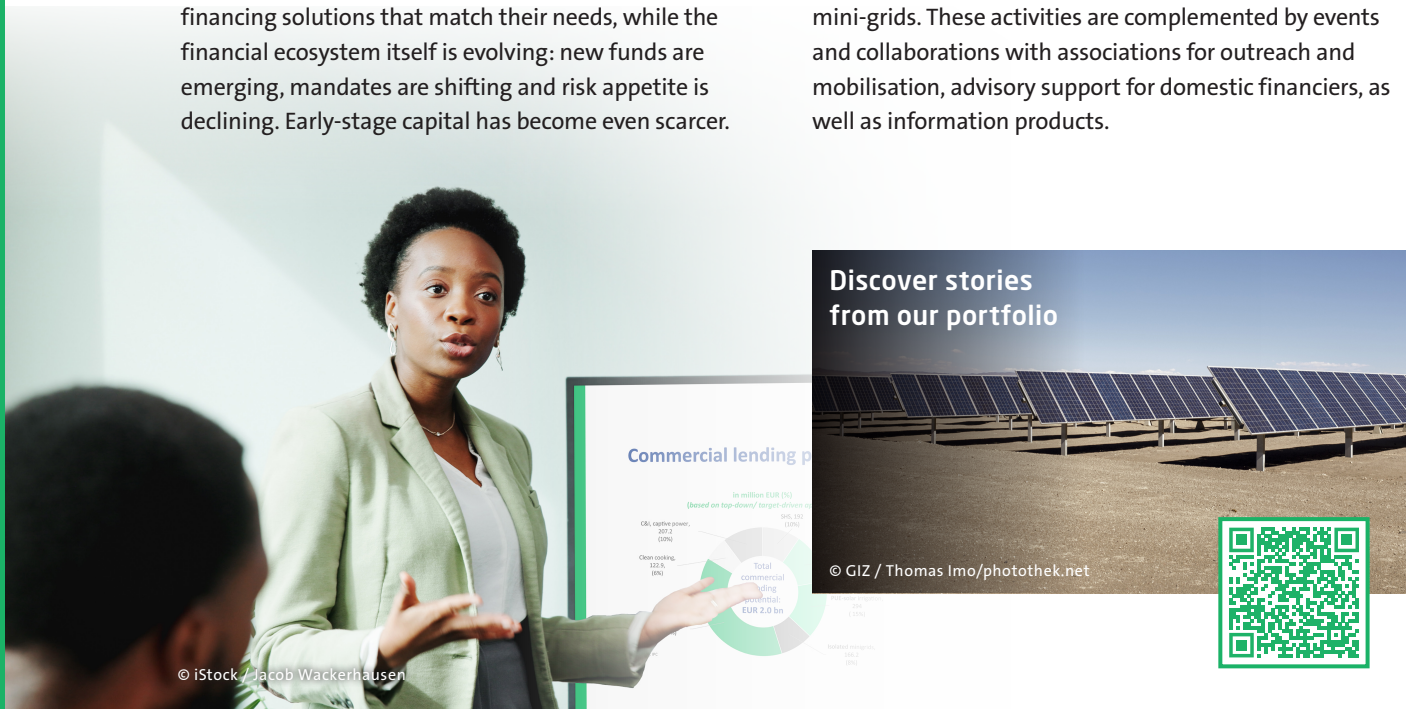

## THE CHALLENGE

Systemic barriers to clean energy investment persist. While there is broad consensus that private sector engagement and private capital are essential, the gap between demand and supply for finance remains – and may even be widening.

At the same time, the clean energy landscape is becoming more complex. Projects and firms require financing solutions that match their needs, while the financial ecosystem itself is evolving: new funds are emerging, mandates are shifting and risk appetite is declining. Early-stage capital has become even scarcer.

## THE APPROACH

GET.invest offers proven services to help overcome these challenges. At its heart, the programme provides tailored advice to energy project developers and companies on accessing finance. Support covers the full spectrum of clean energy initiatives – from smaller, innovative ventures to utility-scale infrastructure projects. It is technology-agnostic, encompassing diverse business models such as grid-connected power, green hydrogen, e-mobility and mini-grids. These activities are complemented by events and collaborations with associations for outreach and mobilisation, advisory support for domestic financiers, as well as information products.

GET.invest is co-funded by

## THE PARTNERSHIPS

GET.invest operates through strong partnerships. These are key to amplifying the programme's effectiveness, sharing knowledge and expanding its outreach. As such, GET.invest is embedded in an ecosystem that connects with a wide range of actors – both those supporting the private sector to mobilise clean energy investment and capital providers responding to this need. By working directly with financiers, it ensures that project proposals meet their requirements and expectations.

To ensure effective information flow and alignment with market needs, the programme engages with industry associations. In addition, GET.invest maintains flexible cooperation with a broad range of development programmes and initiatives.

## GET.INVEST PIPELINE, 2016 - 02/2026

## THE CONTEXT

The programme is a joint initiative of the European Union under its Global Gateway strategy, Germany, Norway, the Netherlands, Sweden and Austria. GET.invest operates within the Global Energy Transformation Programme (GET.pro), implemented by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ).
